<i>Notation</i>	<i>xiii</i>
1 THEORY OF KNOWLEDGE	1
1.1 Pure and applied mathematics	1
1.2 Axioms	1
1.3 Proof	4
1.3.1 Rules of inference	4
1.3.2 Proof by exhaustion	5
1.3.3 Direct proof	5
1.3.4 Proof by contradiction	6
1.4 Paradox	8
1.4.1 What is a paradox?	8
1.4.2 Russell's Paradox	9
1.5 Mathematics and other disciplines	10
2 INTRODUCTION TO THE GRAPHICS DISPLAY CALCULATOR	13
2.1 The graphics display calculator	13
2.1.1 Keypad instructions	13
2.1.2 Moving about the calculator screen	13
2.1.3 Computation	14
2.1.4 Functions	15
2.1.5 Alphabet keys	17
2.1.6 Graphing keys and tables of functions	18
2.1.7 Statistics and matrices	19
2.1.8 Programs	19
2.1.9 Solution of equations	19
3 INTRODUCING PROJECT WORK	21
3.0 Introducing project work	21
3.1 Carrying out projects	22
3.1.1 Choice of topic (defining the problem)	22
3.1.2 What will define a good decision?	23
3.1.3 Collecting data	23
3.1.4 Analysing the data	25
3.1.5 Conclusion	25
3.2 Approaching your project	26
3.2.1 Idea 1: Monte Carlo methods	26
3.2.2 Idea 2: Damped oscillations	28
3.2.3 Idea 3: Statistics (weights in lifts and transport, chapters 19 and 20)	37
3.2.4 Yes, yes, ... but where do I start?	40
3.3 Assorted topics for project work	40
3.4 Challenging problems	61

4	NUMBER SYSTEMS	79
4.0	Roman and Babylonian numbers	79
4.1	Number systems	79
4.2	Significant figures	84
4.2.1	Quoting significant figures	84
4.2.2	Rounding	85
4.3	Scientific notation	86
4.4	Rounding errors	90
4.4.1	Absolute error	90
4.4.2	Relative and percentage error	91
4.5	Computation errors	93
4.6	Miscellaneous questions	97
4.7	Graded revision questions	98
4.8	Topic test	100
4.9	Project suggestions	101
5	LINEAR EQUATIONS	103
5.0	Algebra and puzzles	103
5.1	The Real number line	103
5.2	Solving linear equations	106
5.3	Problem solving using linear equations	114
5.4	Linear inequations	121
5.5	Problem solving using linear inequations	124
5.6	Miscellaneous questions	126
5.7	Graded revision questions	127
5.8	Topic test	128
5.9	Project suggestions	129
6	LINEAR GRAPHS	131
6.0	Carbon dioxide	131
6.1	Graphs	132
6.1.1	Introducing linear graphs	132
6.1.2	Summary of linear graphs	138
6.2	Gradient form of a line	141
6.2.1	The gradient of a straight line	141
6.2.2	Equation of straight line from two points	142
6.2.3	Other forms of equations for straight lines	143
6.3	Simultaneous equations	146
6.3.1	Graphical methods	146
6.3.2	Algebraic method	149
6.3.3	Applications of simultaneous equations	155
6.4	Miscellaneous questions	157
6.5	Graded revision questions	159
6.6	Topic test	162
6.7	Project suggestions	163

7	QUADRATIC EQUATIONS AND GRAPHS	165
7.0	Cannon balls	165
7.1	Factorization	166
7.1.1	What is factorization?	166
7.1.2	Factorization by grouping	166
7.2	Factorization of quadratics	168
7.2.1	Quadratics of the form $x^2 + bx + c$ (i.e. $a = 1$)	169
7.2.2	Quadratics of the form $ax^2 + bx + c$ (i.e. $a \neq 1$)	172
7.2.3	Perfect squares and difference of squares	175
7.2.4	Factorizing by completing the square	178
7.3	Quadratic equations	182
7.3.1	The factorization method	182
7.3.2	Equations solved by completing the square	184
7.3.3	Equations solved by using the formula	186
7.4	Quadratic graphs	187
7.4.1	The basics – dilations and translations	187
7.4.2	Turning point form	191
7.4.3	Expressing a function in turning point form	195
7.4.4	The intercept method	197
7.5	Using a graphics calculator to factorize quadratics	202
7.6	Systems of equations	204
7.6.1	Linear-quadratic system	204
7.6.2	Quadratic-quadratic system	206
7.7	Miscellaneous questions	208
7.8	Graded revision questions	210
7.9	Topic test	212
7.10	Project suggestions	214
8	FUNCTIONS AND RELATIONS	215
8.0	Relationships	215
8.1	Relations	215
8.1.1	Relations	216
8.1.2	The Cartesian plane	218
8.1.3	Implied domain	219
8.1.4	Types of relations	220
8.1.5	Sketching with the graphics calculator	220
8.2	Functions	226
8.2.1	Definitions	226
8.3	Some standard functions	232
8.3.1	Hybrid functions and continuity	232
8.3.2	The absolute value function	234
8.4	More equations	235
8.4.1	Solving equations involving unfamiliar functions	235
8.5	Miscellaneous questions	237
8.6	Graded revision questions	239
8.7	Topic test	241
8.8	Project suggestions	242

9	MODELLING: LINEAR AND QUADRATIC FUNCTIONS	243
9.0	Fibonacci	243
9.1	Modelling	243
9.1.1	Modelling – Phase 1	243
9.1.2	Modelling – Phase 2	248
9.1.3	Modelling – Phase 3	257
9.2	Miscellaneous questions	265
9.3	Graded revision questions	266
9.4	Topic test	270
9.5	Project suggestions	273
	REVISION SET A - PAPER 1 & PAPER 2-STYLE QUESTIONS	275
10	EXPONENTIAL FUNCTIONS	281
10.0	Exponentials	281
10.1	Exponential functions	282
10.1.1	The exponential function	282
10.2	Solving exponential equations	288
10.3	Applications	290
10.4	Miscellaneous questions	296
10.5	Graded revision questions	298
10.6	Topic test	299
10.7	Project suggestions	300
11	COORDINATE GEOMETRY AND FURTHER MODELLING	301
11.0	Navigating	301
11.1	Coordinate geometry	301
11.1.1	Two-dimensional coordinate geometry	301
11.1.2	Distance between two points	302
11.2	Linear equations	304
11.2.1	Standard forms of linear equations	304
11.2.2	Properties of straight lines	304
11.3	Applications in two dimensions	307
11.4	Using an accurate graphing method to solve equations	309
11.5	Miscellaneous questions	311
11.6	Graded revision questions	313
11.7	Topic test	315
11.8	Project suggestions	316
12	SEQUENCES AND SERIES	317
12.0	Crash data	317
12.1	Arithmetic sequences and series	318
12.1.1	Arithmetic sequences	318
12.1.2	Arithmetic series	323
12.1.3	Sigma notation	326
12.2	Geometric sequences and series	330
12.2.1	Geometric sequences	330
12.2.2	Geometric series	334

12.2.3	Combined arithmetic and geometric sequences and series	338
12.2.4	Convergent series	340
12.3	Compound interest and superannuation	343
12.3.1	Compound interest	343
12.3.2	Superannuation	344
12.4	Miscellaneous questions	347
12.5	Graded revision questions	348
12.6	Topic test	350
12.7	Project suggestions	351
13	SET THEORY	353
13.0	Russell's paradox	353
13.1	Definitions	353
13.1.1	Sets	353
13.1.2	Notation	354
13.2	Sets of numbers	358
13.2.1	Number systems	358
13.3	Cardinal number of a set	361
13.3.1	Cardinal number of a set	361
13.3.2	Finite and infinite sets	361
13.4	The algebra of sets	363
13.4.1	Equality of sets	363
13.4.2	Equivalent sets	364
13.4.3	Subsets	364
13.4.4	Special subsets	364
13.4.5	Proper subsets	365
13.4.6	The number of subsets	365
13.4.7	Intersection of sets	366
13.4.8	Union of sets	366
13.4.9	The universal set	368
13.4.10	The complement	368
13.5	Venn diagrams	370
13.5.1	Definition	370
13.5.2	Disjoint sets	371
13.6	Applications	374
13.6.1	The number of elements in two regions	374
13.6.2	The number of elements in three regions	376
13.7	Miscellaneous questions	379
13.8	Graded revision questions	382
13.9	Topic test	383
13.10	Project suggestions	384
14	LOGIC	385
14.0	Lewis Carroll	385
14.1	Definitions	386
14.1.1	Logic and propositions	386
14.1.2	Notation	387

14.1.3	Truth values	388
14.1.4	Implications	394
14.1.5	Converse, inverse and contrapositive of implications	397
14.1.6	Equivalence ‘if and only if’, iff, \Leftrightarrow	398
14.1.7	Tautologies and contradictions	400
14.1.8	Testing the validity of simple arguments using truth tables	402
14.2	Miscellaneous questions	404
14.3	Graded revision questions	407
14.4	Topic test	408
14.5	Project suggestions	410
15	PROBABILITY	411
15.0	Gambling	411
15.1	Probability	412
15.1.1	Probability as a long-term relative frequency	412
15.1.2	Theoretical probability	412
15.1.3	Laws of probability	413
15.1.4	Definition of probability	413
15.1.5	Problem-solving strategies in probability	414
15.2	Probability and Venn diagrams	416
15.3	Conditional probability	421
15.3.1	Informal definition of conditional probability	421
15.3.2	Formal definition of conditional probability	421
15.3.3	Independence	423
15.4	Miscellaneous questions	428
15.5	Graded revision questions	430
15.6	Topic test	432
15.7	Project suggestions	433
	REVISION SET B - PAPER 1 & PAPER 2-STYLE QUESTIONS	435
16	SOLUTION OF TRIANGLES	441
16.0	Trigonometry	441
16.1	Trigonometric ratios	442
16.1.1	Review of trigonometric functions for right-angled triangles	442
16.1.2	Exact values	442
16.2	Applications	448
16.2.1	Angle of elevation and depression	448
16.2.2	Bearings	449
16.3	Right angles in three dimensions	452
16.4	Area of a triangle	457
16.5	Non-right-angled triangles	460
16.5.1	The sine rule	460
16.5.2	The ambiguous case	464
16.5.3	Applications of the sine rule	468
16.5.4	The cosine rule	469
16.5.5	Applications of the cosine rule	472

16.6	Miscellaneous questions	474
16.7	Graded revision questions	478
1.68	Topic test	482
16.9	Project suggestions	483
17	NORMAL DISTRIBUTION	485
17.0	Normal distribution	485
17.1	The normal distribution	485
17.1.1	Why the normal distribution?	485
17.1.2	The standard normal curve	486
17.1.3	Using the standard normal table	487
17.2	Formalizing the definition of the normal distribution	490
17.2.1	The normal distribution	490
17.2.2	Properties of this curve	491
17.2.3	Finding probabilities using the normal distribution	491
17.2.4	The standard normal distribution	491
17.2.5	Finding probabilities	492
17.2.6	Standardizing any normal distribution	493
17.2.7	Inverse problems	497
17.2.8	Finding quantiles	499
17.3	Miscellaneous questions	502
17.4	Graded revision exercises	503
17.5	Topic test	505
17.6	Project suggestions	506
18	GEOMETRY OF TWO- AND THREE-DIMENSIONAL SHAPES	509
18.0	Geometric structures	509
18.1	Perimeter and area	510
18.2	Surface area of prisms	518
18.3	Volume	522
18.3.1	Volume of a prism	522
18.3.2	Volume of pyramids, cones and spheres	523
18.4	Miscellaneous questions	528
18.5	Graded revision questions	529
18.6	Topic test	532
18.7	Project suggestions	533
	REVISION SET C - PAPER 1 & PAPER 2-STYLE QUESTIONS	535
19	STATISTICS	541
19.0	Runways	541
19.1	Describing data	541
19.1.1	Data collection	541
19.1.2	Types of data	542
19.1.3	Discrete and continuous data	542
19.2	Frequency diagrams	543
19.2.1	Producing a frequency diagram	543
19.2.2	Using a graphics calculator	545

MATHEMATICAL STUDIES - Standard Level

19.3	Statistical measures 1	547
19.3.1	Measure of central tendency	547
19.3.2	Mode	547
19.3.3	Mean	547
19.3.4	Median	549
19.4	Statistical measures 2	550
19.4.1	Measures of spread	550
19.4.2	Variance and standard deviation	551
19.4.3	Using a graphics calculator	553
19.5	Statistical measures 3	555
19.5.1	Quartiles	555
19.5.2	Box-plots	556
19.6	Miscellaneous questions	559
19.7	Graded revision questions	563
19.8	Topic test	565
19.9	Project suggestions	566
20	BIVARIATE ANALYSIS	567
20.0	Drugs and health	567
20.1	Correlation	568
20.1.1	Introduction	568
20.1.2	Scatter diagram	569
20.1.3	Using the graphics calculator	570
20.2	Correlation coefficient	573
20.2.1	Strength of a linear relationship	573
20.2.2	Properties of r	574
20.2.3	Scatter plot and corresponding r values	574
20.2.4	Cause and association	575
20.2.5	Determining the value of r from a data set	576
20.2.6	Interpreting r and r^2	579
20.3	Line of best fit	584
20.3.1	Line of best fit – by eye	584
20.3.2	Line of best fit – using locus of means	585
20.3.3	Line of best fit – methods of least squares	587
20.3.4	Another form of the regression line	589
20.4	Miscellaneous questions	593
20.5	Graded revision questions	596
20.6	Topic test	598
20.7	Project suggestions	599
21	CONTINGENCY TABLES	601
21.0	Long necks and islands	601
21.1	Contingency tables	602
21.2	Miscellaneous questions	612
21.3	Graded revision questions	614
21.4	Topic test	615
21.5	Project suggestions	616

22 FINANCIAL MATHEMATICS	617
22.0 Money	617
22.1 Currency conversions	617
22.1.1 Introduction	617
22.1.2 Basic conversions	618
22.1.3 Commission	620
22.2 Interest	622
22.2.1 Simple interest	622
22.2.2 Compound interest	625
22.2.3 Comparing simple and compound interest	630
22.2.4 Finding time in compound interest	636
22.3 Depreciation	638
22.3.1 Introduction	638
22.3.2 Flat rate (straight-line) depreciation	639
22.3.3 Reducing balance depreciation	643
22.3.4 Unit cost depreciation	648
22.4 Financial tables	652
22.4.1 Investments and savings	652
22.4.2 Loan repayments	654
22.4.3 Inflation	657
22.5 Miscellaneous questions	658
22.6 Graded revision questions	663
22.7 Topic test	664
22.8 Project suggestions	665
REVISION SET D - PAPER 1 & PAPER 2-STYLE QUESTIONS	667
23 RATES OF CHANGE	673
23.0 Athletics	673
23.1 Quantitative measure	674
23.1.1 Functional dependence	674
23.1.2 Quantitative aspects of change	674
23.1.3 Average rate of change	675
23.1.4 Determining the average rate of change	675
23.1.5 Velocity as a measure of the rate of change of displacement	677
23.2 Qualitative measure	681
23.2.1 Qualitative aspects of change	681
23.2.2 Describing the behaviour of a graph	681
23.2.3 Producing a graph from a physical situation	681
23.3 Instantaneous rate of change	684
23.3.1 Informal idea of limits	684
23.4 Differentiation process	688
23.4.1 The derivative and the gradient function	688
23.4.2 Notation and language	689
23.5 Miscellaneous questions	693
23.6 Graded revision questions	696

23.7	Topic test	698
23.8	Project suggestions	699
24	DIFFERENTIATION AND CURVE SKETCHING	701
24.0	The bottom line	701
24.1	Differentiation	701
24.1.1	Review	701
24.1.2	Power rule for differentiation	705
24.1.3	Derivative of a sum or difference	706
24.2	Graphical interpretation of the derivative	708
24.2.1	The value of the derivative at a particular point on a curve	708
24.2.2	Gradient function from a graph	713
24.3	Tangents	715
24.3.1	Equation of tangent	715
24.3.2	Equation of a normal	717
24.4	Curve sketching	720
24.4.1	Increasing and decreasing functions	720
24.4.2	Stationary points	721
24.4.3	Global maxima and minima	728
24.4.4	Summary	729
24.5	Applied maxima and minima problems	732
24.5.1	Maxima–minima problems	732
24.5.2	Optimization for integer-valued variables	738
25.6	Miscellaneous questions	741
25.7	Graded revision questions	744
25.8	Topic test	746
25.9	Project suggestions	747
	REVISION SET E - PAPER 1 & PAPER 2-STYLE QUESTIONS	749
	ANSWERS	757
